Steps to cover dark shadows around the eye

Use an eye cream to hydrate, pat around orbital bone, not on eye lid or corners of eyes. I recommend Kiehl's Avocado hydrating eye cream -

Colour correct the darkest parts of the skin. Use only a little and dab using your finger or a little flat brush. For a more purple shade under eye colour use a peachy tone-

Find your matching concealer. Dab on the dark circles and around the eyes to match the concealer with the rest of your skin. Use fingers or flat brush. Try not to wipe the concealer. Instead dab on a little bit at a time.

In the video - you can clearly see the steps (method) to apply concealer to dark shadows. Please note the girl applies the make-up heavily.
